

## Save the Dates for the annual California Boating Congress Join us in Sacramento on April 28-29, 2026

Annual event is THE must attend event to meet government officials who impact our industry.

The annual California Boating Congress (CBC), a one-day policy conference focused on legislative and regulatory impacts on marine, boating, waterway, and recreation industries, is scheduled for April 28-29, 2026 in Sacramento, California. The conference is steps away from California's State Capitol and will feature lawmakers, policymakers, and statewide elected officials who will share their views on issues facing marinas, boating, and water recreation.

"The impact of the California Boating Congress goes beyond sharing two-days in Sacramento advocating for our respective industries," said Arron Pellarin, immediate past president of the Marine Recreation Association, a co-host of the event. "Our work in and around the State Capitol is an industry-unified voice to make real impact on legislation and regulations that will negatively impact our businesses. The CBC is the foundation of that work."

The CBC kicks-off on the afternoon of Tuesday, April 28 with policy sessions and networking opportunities for attendees. On Wednesday, April 29, attendees will hear from state legislators and top regulators on issues such as abandoned vessels, challenges with securing insurance for marinas and vessels, California Air Resources Board regulations, and an economic outlook for the state's marine and waterways industry.

Our industry's voice is needed now more than ever in California. Join us for the California Boating Congress to help shape legislation and regulations that are facing you and your business.

Look for location, schedule, and hotel information when registration for the California Boating Congress opens in March 2026. Learn more at [www.marina.org/cbc](http://www.marina.org/cbc). The California Boating Congress is an industrywide partnership and co-hosted by:
